To whom it may concern

RE: RECYCLED CONTENT STATEMENT

This letter is to confirm that steel manufactured by BlueScope Steel Limited in Australia, contains recycled content as follows:

Total recovered content: the proportion of recovered material in the steel produced in the blast furnace-basic oxygen steelmaking process by BlueScope Steel in Australia is, on average, 25 per cent.

Post-consumer recycled content: 8.5 per cent of the steel is post-consumer recycled material.

Pre-consumer recycled content: 6.5 per cent of the steel is pre-consumer recycled material.

The percentages above are averages based on currently available information.

Yours sincerely
